Re: Supply Of Nickel Cadmium Batteries On Hold Until Further Notice

Due to a component supplier problem, shipments of the nickel cadmium (NiCd) portable radio batteries listed below have been put on hold until further notice.

Please note that this applies only to NiCd batteries - lithium ion (Lilon) and nickel metal hydride (NiMH) batteries are not affected and continue to be available.

Suggested alternatives for the NiCd batteries currently on hold are provided in the table below.

Radio platform	NiCd battery on hold		Suggested alternatives	
	Part Number	Description	Part Number	Description
GP Professional	HNN9011	NiCd 1550mAh (FM)	HNN9010AR	NiMH 1800mAh (FM)
GP Professional	HNN9012	NiCd 1550mAh	HNN9008AR	NiMH 1400mAh
GP900/1200	HNN9028	NiCd 1500mAh (IMPRES)	NTN7143D	NiMH 1200mAh
GP900/1200	HNN9029	NiCd 1500mAh (FM, IMPRES)	NTN7372B	NiMH 1100mAh (FM)
GP900/1200	NTN7144	NiCd 1500mAh	NTN7143D	NiMH 1200mAh

Please note that the alternatives suggested above are **not** direct replacements - for example, battery capacities and operating temperature ranges may vary. Other alternatives are available that may better match your customers' requirements.

Investigations with our component supplier are underway – at this time the resolution date is unknown. I will provide an update once I have further information.

Please accept my sincere apologies for the inconvenience caused to you and your customers.

Best regards,

Tim Clark
Director Professional & Commercial Radio Products
